Interfaces (11)

Element	Outcome	Detail / generated output
GigabitEthernet0/0	converted	▶ output
GigabitEthernet0/1	converted	▶ output
GigabitEthernet0/4	converted	▶ output
GigabitEthernet0/5	converted	▶ output
Port-channel10	converted	▶ output
GigabitEthernet0/2	converted	▶ output
GigabitEthernet0/2.20	converted	▶ output
GigabitEthernet0/2.30	converted	▶ output
GigabitEthernet0/2.40	converted	▶ output
GigabitEthernet0/2.50	converted	▶ output
Management0/0	converted	▶ output

Zones (7)

Element	Outcome	Detail / generated output
---------	---------	---------------------------

outside	converted	► output
dmz	converted	► output
inside	converted	► output
voice	converted	► output
guest	converted	► output
oob-mgmt	converted	► output
mgmt	converted	► output

Network objects (35)

Element	Outcome	Detail / generated output
SRV-WEB01	converted	► output
SRV-WEB02	converted	► output
SRV-MAIL01	converted	► output
SRV-DNS01	converted	► output
SRV-DNS02	converted	► output
SRV-AD01	converted	► output
SRV-AD02	converted	► output
SRV-FILE01	converted	► output
SRV-PRINT01	converted	► output
SRV-ERP-APP	converted	► output
SRV-ERP-DB	converted	► output
SRV-BACKUP01	converted	► output
SRV-MON01	converted	► output
SRV-SYSLOG01	converted	► output
SRV-JUMP01	converted	► output
SRV-VPN-CONC	converted	► output
SRV-SFTP01	converted	► output

SRV - PROXY01	converted	▶ output
PBX - CORE	converted	▶ output
PBX - MEDIA	converted	▶ output
NET - CORP	converted	▶ output
NET - VOICE	converted	▶ output
NET - GUEST	converted	▶ output
NET - MGMT	converted	▶ output
NET - DMZ	converted	▶ output
NET - BRANCH - MUC	converted	▶ output
NET - BRANCH - HAM	converted	▶ output
NET - BRANCH - BER	converted	▶ output
NET - PARTNER - A	converted	▶ output
NET - VENDOR - VPN	converted	▶ output
RANGE - DHCP - GUEST	converted	▶ output
RANGE - VDI - POOL	converted	▶ output
FQDN - WINDOWSUPDATE	converted	▶ output
FQDN - CRL	converted	▶ output
FQDN - SAAS - CRM	converted	▶ output

Service objects (9)

Element	Outcome	Detail / generated output
TCP - 8443	converted	▶ output
TCP - 3389	converted	▶ output
TCP - 1521	converted	▶ output
UDP - 5060	converted	▶ output
TCP - 5061	converted	▶ output
TCP - 8080	converted	▶ output

TCP - 9997	converted	▶ output
UDP - 4500	converted	▶ output
RANGE - RTP	converted	▶ output

Object groups (12)

Element	Outcome	Detail / generated output
GRP - DMZ - WEB	converted	▶ output
GRP - AD	converted	▶ output
GRP - DNS	converted	▶ output
GRP - BRANCHES	converted	▶ output
GRP - INTERNAL - ALL	converted	▶ output
GRP - MGMT - STATIONS	converted	▶ output
GRP - ERP	converted	▶ output
GRP - SVC - WEB	converted	▶ output
GRP - SVC - MAIL	converted	▶ output
GRP - SVC - AD	converted	▶ output
GRP - SVC - DNS	converted	▶ output
GRP - SVC - MGMT	converted	▶ output

Access rules (43)

Element	Outcome	Detail / generated output
outside_access_in	converted	▶ output
outside_access_in	converted	▶ output
outside_access_in	converted	▶ output
outside_access_in	partial	service GRP-PROTO-VPN unresolved — left as any, VERIFY ▶ output
outside_access_in	converted	▶ output
outside_access_in	converted	▶ output

outside_access_in	partial	ICMP service expressed as App-ID ping/icmp ▶ output
outside_access_in	converted	▶ output
inside_access_in	converted	▶ output
inside_access_in	converted	▶ output
inside_access_in	converted	▶ output
inside_access_in	converted	▶ output
inside_access_in	converted	▶ output
inside_access_in	converted	▶ output
inside_access_in	converted	▶ output
inside_access_in	converted	▶ output
inside_access_in	converted	▶ output
inside_access_in	converted	▶ output
inside_access_in	converted	▶ output
inside_access_in	converted	▶ output
inside_access_in	converted	▶ output
inside_access_in	converted	▶ output
inside_access_in	converted	▶ output
inside_access_in	converted	▶ output
dmz_access_in	converted	▶ output
dmz_access_in	converted	▶ output
dmz_access_in	converted	▶ output
dmz_access_in	converted	▶ output
dmz_access_in	converted	▶ output
dmz_access_in	converted	▶ output
guest_access_in	converted	▶ output
guest_access_in	converted	▶ output

guest_access_in	converted	► output
guest_access_in	converted	► output
voice_access_in	converted	► output
voice_access_in	converted	► output
voice_access_in	converted	► output
voice_access_in	converted	► output
voice_access_in	converted	► output
mgmt_access_in	converted	► output
mgmt_access_in	converted	► output
mgmt_access_in	converted	► output
mgmt_access_in	converted	► output

NAT rules (13)

Element	Outcome	Detail / generated output
SRV-WEB01	converted	► output
SRV-WEB02	converted	► output
SRV-MAIL01	converted	► output
SRV-SFTP01	converted	► output
NET-CORP	partial	set the egress interface for interface-address PAT (mapping step does not know the target port name) ► output
NET-GUEST	partial	set the egress interface for interface-address PAT (mapping step does not know the target port name) ► output
NET-VOICE	partial	set the egress interface for interface-address PAT (mapping step does not know the target port name) ► output
nat-8	converted	► output
nat-9	converted	► output
nat-10	converted	► output

nat-11	converted	► output
nat-12	converted	► output
nat-13	partial	set the egress interface for interface-address PAT (mapping step does not know the target port name) ► output

Static routes (6)

Element	Outcome	Detail / generated output
0.0.0.0/0	converted	► output
10.61.0.0/16	converted	► output
10.62.0.0/16	converted	► output
10.63.0.0/16	converted	► output
10.20.4.0/24	converted	► output
10.51.0.0/16	converted	► output

Captured features (manual review) (10)

Element	Outcome	Detail / generated output
GRP-PROTO-VPN	manual review	other: object-group protocol — review on target — not auto-converted in v1; source lines preserved in the report
GRP-ICMP-OK	manual review	other: object-group icmp-type — review on target — not auto-converted in v1; source lines preserved in the report
ikev2 policy 10	manual review	vpn: crypto configuration — not auto-converted in v1; source lines preserved in the report
ipsec ikev2 ipsec-proposal AES256-SHA256	manual review	vpn: crypto configuration — not auto-converted in v1; source lines preserved in the report
map OUTSIDE-MAP 10 match address VPN-MUC	manual review	vpn: crypto configuration — not auto-converted in v1; source lines preserved in the report
map OUTSIDE-MAP 10 set peer 203.0.113.10	manual review	vpn: crypto configuration — not auto-converted in v1; source lines preserved in the report
map OUTSIDE-MAP 10 set ikev2 ipsec-	manual review	vpn: crypto configuration — not auto-converted in v1; source lines preserved in the report

proposal AES256-
SHA256

map OUTSIDE-MAP
interface outside

manual review

vpn: crypto configuration — not auto-converted in v1; source
lines preserved in the report

ca trustpoint ASDM-
TrustPoint-0

manual review

certificate: PKI trustpoint/certificate — not auto-converted in
v1; source lines preserved in the report

BUSINESS-HOURS

manual review

other: time-range (schedule) — not auto-converted in v1;
source lines preserved in the report

Captured feature source lines

Everything RuleForge recognised but did not auto-convert, preserved verbatim so nothing is lost.

Context lab-edge-fw01

- ▶ [other] GRP-PROTO-VPN — object-group protocol — review on target
- ▶ [other] GRP-ICMP-OK — object-group icmp-type — review on target
